# Remote Assist Technology now available on the SONIMAGE® HS2 Ultrasound System.

Konica Minolta's Remote Assist is a software feature on all HS2 Systems providing the end user remote service and clinical support for their system.

REMOTE DIAGNOSTICS FOR SERVICE-RELATED ISSUES AND CLINICAL SUPPORT

Designed to benefit the end user by allowing real-time tech support by our expert staff and clinical applications assistance at your convenience.

- Quick response for diagnosing service issues
- Access to applications support after installation
- Training for additional staff following initial applications training
- No waiting or fees for physical visits from Applications Specialists if users require additional assistance post-installation
- HIPAA compliance protection
- Included with all warranty and extended warranty plans
