

A Simplified, Powerful Solution.

Symmetry® Mini PACS is built on the proven **Exa® Platform** for fast access to images from any device scaled for the specialty care market. Symmetry Mini PACS provides your practice with the features and tools necessary to **optimize and simplify workflow** with an entirely web-based, Zero Footprint (ZFP) imaging software platform far superior to other PACS systems available on the market.

Zero Footprint Viewer — No Downloads Necessary. Instant Access, Anywhere, from Any Device

Symmetry Mini PACS ZFP viewer offers full diagnostic toolsets and viewing capabilities from any computer. ZFP allows for immediate viewing on any consumer grade PC with no downloads, plugins or installations necessary.

- Share studies with patients in your office with tablet
- View images in the operating room with tablet
- Review studies on the go with phone

Platform

- Workstation server included with 4TB of storage
- Up to 2 TB of data migration at \$2,500 per TB

Out-of-the Box Implementation

- Preconfigured workstation for users and display protocols
- Setup instructions, how to guides and training videos provided on workstation server

Server-Side Rendering

- Server-side Rendering means images stay on the server and are available on any device with a browser.
- Reduces workstation hardware technical requirements, because the server is taking on the workload of image rendering

Cybersecurity

With no data transferred to or stored on workstations, Symmetry Mini PACS minimizes unwanted exposure to patient data.

Peace of Mind

- Konica Minolta has 150 years of innovation
- Customer support for 5-year term; no new charges added after the first year
